

# PARmate

## Dramatic Illuminations

Whether you're specifying for security lighting, traditional downlighting, interior applications or uplighting in wet locations, **PARmate PUTS NEW DESIGN POSSIBILITIES** at your fingertips. It is the perfect blend of function and contemporary aesthetics at a fraction of the price you would expect to pay.

The long established durability of Lexan® is your assurance that the **PARmate FIXTURE YOU SPECIFY WON'T CRACK, FADE, CORRODE OR DISCOLOR OVER TIME.** As a result, all the aesthetic considerations that went into your choice of PARmate are there to stay ... for years or even decades.

## Beyond Function

PARmate's integrated shroud and body design provides a sleek, distinctive appearance for single, double or triple lampholders. The low profile shroud opens a new world of flair and fashion and ensures minimum lamp exposure both in PARmate 20 and PARmate 38 applications.

PARmate's one-of-a-kind silicone seal and weatherproof box mean rain, snow and sleet are no longer design limitations, even for uplighting in open, unsheltered areas. That's why PARmate is CSA certified for indoor and outdoor use, and UL certified for wet locations.

With an innovative self-locking thumb clip plus a unique locknut and sleeve, PARmate's lighting angle is easy to adjust permanently with one hand simplicity and no tools.

This unique fixture from Canlet won't "droop" over time either, making constant readjustment of the lighting angle unnecessary, even after years of use. However, the angle can be changed at any time, quickly and easily, because the adjustment joints won't strip or seize up over time.

Easy, precise adjustability maintains the lighting angle without readjustment.

## Innovative Design

- 1 Unique locknut and sleeve secure lampholder in place.
- 2 Patented self-locking thumb clip enables easy adjustment without the need for tools.
- 3 Durable, corrosion-proof Lexan® construction.
- 4 Integral silicone seal keeps out water, even when pointing up.
- 5 Patented snap on shrouds reduce glare and stray light.
- 6 Optional matching Lexan® weatherproof box with five 1/2" threaded hubs.
